

YWRC Volunteer COVID-19 Procedure

If volunteer is showing any symptoms of COVID-19, has been in close contact with anyone who has tested positive, or living with a positive COVID-19 case, please stay home and follow CDC guidelines for length of quarantine. General guideline requires 10 days post on-set of symptoms or 14 days if exposed to positive COVID-19 case.

In all cases, volunteers must be without a fever for 24 hours without the use of fever-reducing medications before joining an in-person event.

If volunteer has tested positive for COVID-19 and was present in the building within past week, we encourage you to please inform Cindy Tello . This will allow us to inform necessary employees and other participants of possible exposure.

We will take every effort to notify volunteers if they have been in direct contact with a confirmed COVID-19 positive individual while receiving in-person services.

All in-person services require masks, 6ft of distance and consistent sanitization.
